HR of Brightly Software

**Subject:** Application for Angular Developer Position

Dear Hiring HR,

I am excited to apply for the Angular Developer position at Brightly Software. With over three years of experience in front-end development, specializing in Angular 16, Node.js, and MongoDB, I am eager to bring my expertise in building dynamic and responsive web applications to your team.

In my current role as a Junior Developer at Seer Infosystem, I have successfully contributed to projects like Sutrakar and Vindhyamrut, developing e-commerce platforms with features such as shopping carts, guest checkouts, and inventory management. My proficiency in HTML, CSS, JavaScript, and Bootstrap, coupled with performance optimization techniques like lazy loading and caching, has enhanced user experience and application efficiency.

Beyond technical skills, I am adept at Agile methodologies, Git-based version control, and thorough testing to ensure reliability and security. I am passionate about continuous learning and collaboration, making me a strong addition to a forward-thinking development team.

I would welcome the opportunity to discuss how my skills and experience align with your team's goals. Thank you for your time and consideration. I look forward to your response.

Best regards,

Mohit Purohit
